A Consumer Information Sheet may be obtained from the management.

Licensed and regulated by:
Texas Department of Agriculture,
PO Box 12847, Austin, Texas 78711-2847, Phone 866-918-4481, fax 888-232-2567.

Preparation Steps

Clean the home prior to the pest control visit, and maintain the home as neatly as possible for long-term results. This helps to eliminate competing food sources for the insects. Additionally, when the home is clean, the roaches will be more easily attracted to the bait and not to food sources.

1. Cover and store any open food. Remove foods, dishes, and other small items from countertops.
2. Store and/or cover baby toys, supplies and crib mattress.
3. Mop/scrub kitchen and other hard floors and woodwork with detergent or degreaser. Thoroughly vacuum carpeted floors including under furniture and in corners and along walls.
4. Vacuum up any visible roaches and eggs just before the service visit, using the crevice attachment to get into cracks. After vacuuming, take the vacuum cleaner outside, remove the vacuum bag, seal it, and discard in trash. Take a damp cloth and wipe down the entire vacuum cleaner. Continue to vacuum or otherwise kill any roaches that are seen.
5. Always keep garbage in closed containers and take out the garbage every night.
6. Remove items from the top of the refrigerator, stove, and any other such movable appliances. Prior to service, move these appliances away from the wall, and clean behind and beneath them. If the stove has a removable bottom drawer that opens to the floor, it is not necessary to move the entire stove. **Be sure that the pest control operator has free and full access to anywhere that cockroaches have been seen (or anywhere specified by the technician).**
7. Discard all excess paper products, and any other unused piles or trash, as these are a breeding area for roaches and other pests.
8. Homeowners should repair any water leaks immediately upon detection; apartment residents should report the leak to maintenance immediately upon detection.
9. If anyone in the home has special allergy problems, is pregnant, or is under the age of one, the technician should be informed prior to service and precautions taken. All people and pets should stay out of the area being serviced for the length of time specified by the technician.
10. After service, keep sanitation to as high a level as possible to allow all products to work as swiftly as possible. Do not touch cockroach gel or allow children or pets to get near.

List pests seen and specific locations so that your pest control professional can address your needs: _____

Using Pest Control products like sprays, powders and foggers can be dangerous if applied incorrectly. Do not use any kind of pest products on your own as these may make professional treatment ineffective.

If you are experiencing a pest issue, place a work order with the leasing office.
